Cheque Imaging

Our **4th** Annual Seminar for financial institutions, the banking community, building societies and major cheque users

OCTOBER

THURSDAY

11

9.30am - 4.00pm

As you are aware, the topic of cheque imaging has been gathering pace in the UK since the launch of the new cheque Image Clearing System (ICS) in October 2017.

The TALL Group and Digital Check Corporation, a worldwide leader in the manufacture of cheque scanners, would like to take the opportunity to provide you with an update on the current status of the new clearing system in the UK, how cheque imaging systems are working in other countries and the efficiencies that can be achieved through image capture.

The 4th Annual Cheque Imaging Seminar will also include presentations from the New Payments Services Operator (NPSO), of which the Cheque & Credit Clearing Company is now a wholly owned subsidiary and DIA Kappa. It will showcase success stories in implementing image capture by a major bank and highlight best practices that we have gleaned from extensive industry experience.

We will also demonstrate the latest developments in automated fraud prevention tools for collecting & paying banks, alerting operators to potentially fraudulently altered or counterfeited cheques. Our team will introduce ISF's (Image Survivable Features) as a further effective deterrent to counterfeiting.

You will have the opportunity to put questions to our team and discuss the potential challenges and opportunities of this image-based processing model.

If you would like to join us, see opposite for registration details

Stationers' Hall, Ave Maria Lane, London EC4M 7DD
